Knowledge

Whether creating a more comfortable handle for an industrial sprayer or an innovative automated material handling system in a pharmaceutical laboratory, we have the technical solutions and the manufacturing knowledge to turn your engineering challenges into solutions. Visron Design's staff of engineers and designers has an average of over 20 years experience in the field. This knowledge base consists of broad experience in complex assemblies of plastic, sheet metal and electronic applications. Our team is directed by veteran product development professionals who have experience working with long and short product development cycles.

Speed

At Visron Design, we regard our client's time as the most valuable commodity. We have extensive experience in dealing with both small and large company's internal logistics and have devised quick and timely solutions. Utilizing the latest in modeling and analytical software on state-of-the-art computer systems, our professional design team can carry products from development into manufacturing at benchmark speeds.

Product Engineering Services

From computers to heavy construction equipment, our expert staff represents some of the most diverse design/engineering capabilities you will find anywhere. At Visron, our team members are prized as much for their unique focus and passion in their work, as for their unsurpassed technical skills. We have extensive experience with producing prototypes of complex assemblies in a variety of materials. We can effectively achieve every phase of planning and production needed for you to attain your product design and manufacturing goals.

Benefits:

- An extension of your company's capabilities.
- Inter-linked product development process.
- Enable your team to focus on core competencies.
- Optimize current technologies and methods.
- Accelerated product development process

Areas of Expertise Includes:

Medical Equipment

- Clinical products
- Analytical products
- Customized Automation Systems

Electronic Enclosures

- Computers; workstation, notebook, POS and server
- Office business machines
- Laboratory equipment

Machine design

- Paper-handling
- High speed packaging
- Automation equipment

Heavy Equipment Industry

- Large Medical Washing Systems
- Construction Equipment
- Injection Molding Machinery
- Truck Suspension Systems

Military Equipment

- Radar System Design
- Satellite Wave Guide Systems
- Rugged Portable Computers

Mission

Our mission at Visron Design is to partner with you, our customer, as your engineering/manufacturing resource. Our goal of "Total Customer Satisfaction" is achieved through our team of seasoned professionals, which allows you to concentrate on your core competencies. Visron Design stands for quality and efficiency in completing every job.
